Subject: Release of Facilities for Unrestricted Non-Radiologic Use

Dear Mr. Gabler:

The Department of Energy has completed the extensive process to verify that two facilities at ETEC (Buildings 012 and 030) are no longer radioactively contaminated. Dockets, comprehensive compilations of both the operational history and the cleanup of these facilities, were reviewed by the appropriate offices within DOE. Subsequently, DOE published a notice in the Federal Register that certified the radiological condition of these facilities.

The Department of Energy hereby officially notifies the Energy Technology Center that Building 012 and Building 030 are immediately available for unrestricted non-radiologic use.

Sincerely,

Hannibal Joma
ETEC Site Office Manager
