Subject: DTSC Concurrence - Work Plan for Chemical Data Gap Investigation SSFL - Phase 3

Stephie and John,

The Department of Toxic Substances Control (DTSC) reviewed the Work Plan for Chemical Data Gap Investigation, Phase 3 Soil Chemical Sampling at Area IV (Phase 3 Work Plan - CDM Federal Programs Corporation, March 2012) for the Santa Susana Field Laboratory (SSFL). The Administrative Order on Consent for Remedial Action (AOC; Docket No. HSA-CO 10/11-037) requires the Work Plan to have three components for use in completing the soil chemical characterization of Area IV: (1) Field Sampling Plan (e.g., Master Field Sampling Plan [FSP]); (2) Quality Assurance Project Plan (e.g., QAPP); and (3) Site Health and Safety Plan (e.g., Worker Safety and Health Plan [WSHP]). Standard Operating Procedures (SOPs) are also included with the Phase 3 Work Plan as appendices.

The draft Phase 3 Work Plan and associated appendices were submitted to DTSC for review on January 24, 2012. Since that time, DTSC has provided comments and performed subsequent review of revisions that incorporate DTSC's comments. The revised Work Plan was submitted to DTSC on March 29, 2012. DTSC concurs with sharing this Work Plan and associated appendices with stakeholders, via posting to your web site.

Thanks

Laura
