TOP STUDENTS—Finalists in competition sponsored by Valley Chapter, California Society of Professional Engineers, are briefed on AI nuclear projects. Youngsters, many of whom are future engineers and scientists, visited AI Field Lab as part of CSPE's annual awards program.

AI AT WORK—Pictures by Anthony Dapello and J. D. Frost, of AI Photo, depicting some of research and development work being conducted by AI are currently on display at L. A. County

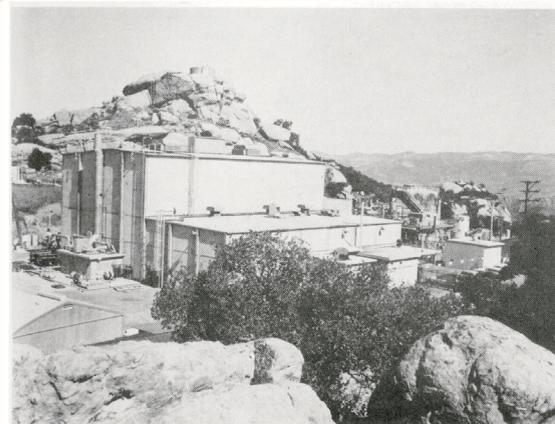

Fair in Pomona. Dapello's entry is at left, one of three by Frost is at right. The photographs are being exhibited along with those from 11 other Southern California industrial firms.

SIGN TO REMEMBER—Rocketdyne's Moss Gasparian, who escaped injury when his brakes failed on road from PFL, dusts off sign on the road for benefit of other motorists. Gasparian's quick thinking in accident saved others from injury.

LONG MAY IT WAVE—While most employees were enjoying the July Fourth holiday, the new 50-star Old Glory was raised for the first time over the General Offices. Pat Williams, left, and Gail Kleeman, both GO, aided in historic event.

ON THE LINE—SRE resumed operation last week using second core of thorium-uranium alloy fuel elements. Experiments and tests will be run before reactor is brought to its full power.

FAMILY VISIT—Braving wind and rain last week for personal tour of AI's Burro Flat Field Laboratories, AI families donned rain garb to visit on Family Tours. More trips are scheduled.

REACTIONS— by Carling

"Every time I ask about the birds and the bees, Pop changes the subject to nuclear reactors."
