Subject: DTSC Approval of DOE Interim Screening Levels

Stephie,

Draft Interim Screening Level (ISL) tables were submitted to the Department of Toxic Substances Control (DTSC) for review and were subsequently revised to adequately address DTSC comments. Use of ISLs will allow review and screening of data, identifying data gaps, and planning for Phase 2/3 investigation sampling until the Lookup Table values are approved. DTSC thus concurs with DOE's proposed ISL tables for soil matrix and soil vapor, dated October 17, 2011. Please note that the draft DOE ISL tables are posted on the DTSC-SSFL web site at:

Thank you,
Laura Rainey
