Subject: [FS#541335] FW: Bird nest location rationale / PRA schedule

DTSC has reviewed the attached Table 1 "Remaining Sampling Locations within Bird Nesting Areas Final Phase 3 Data Gap Analysis" and supporting figures. DTSC finds the proposed rationale for not implementing the 6 soil vapor probe location in Subarea 5A and 3 test pit/trenching locations in Subarea 5D to be acceptable given the circumstances of nesting birds preventing timely access. DTSC concurs with the proposed sampling changes.

Thank you,
Laura Rainey
