April 23, 2007

Sir,

I am a registered voter and a resident of Woolsey Canyon, about one and one half miles from SSFL.

As one of the many victims of Thyroid Cancer, I was horrified at the last DOE meeting when I learnt that you intend on signing off on Rocketdyne by this coming September. You went as far as to say, (the second of two options) your leaving the majority of the contaminates in place!

Furthermore, that in either case (option), you intend to put the site up for “unrestricted use”. This is an unconscionable and unethical decision! **Who are you working for?** These decisions are clearly not in the public’s interests or welfare.

Let me remind you of your promises, as you seem to have forgotten that you gave your word to both the public and our elected officials, that SSFL will be cleaned up and to EPA standards at that! **A CHANGE OF PRESIDENTS OR POLITICAL PARTIES DOES NOT RELEASE YOU FROM YOUR PROMISES OR YOUR RESPONSIBILITY TO US!**

After all these years of your BS, you have lost all your credibility! Hence...I now demand that Mr. Gregg Dempsey, (who is still well respected and who still has volumes of credibility) be put back in charge of the clean up of SSFL, along with a hand chosen crew of his choice.

Let me remind you, you once said that “Mr. Dempsey did not have the time” when we asked for him before. Since that statement, Mr. Riley was approached. He stated that **he does** in fact have the time, so please do not try using that excuse again.

In summary: (1) I do not expect you to sign off on SSFL, but cleaned up to EPA standards, as promised.  
(2) I expect to have more meetings for public input.  
(3) I expect Mr. Dempsey to be put in charge of the clean up with a hand chosen crew of his choice, in order to make your promises good.  
(4) I do not want SSFL to ever put up for unrestricted use!

Thank you,

Elizabeth Thompson (818) 884-4342
